Career Objective

As a fresher I am seeking job opportunities as a Java Developer where I can leverage my expertise in Java, HTML, CSS, JavaScript and Oracle to design and develop innovative web application and websites, while continuously enhancing my technical expertise and advancing my career in software development.

Education

Satyendra Narayan Sinha College   **2021 - 2024**
Bachelor of Computer Applications   *71.8%*

Inter College Bhimpura   **2019 - 2021**
Higher Secondary Certification   *67.6%*

Manas International Public School   **2018 - 2019**
Secondary School Certification   *65.8%*

Projects

Enterprise Banking Transaction System   **Core Java | JDBC | Servlet | JSP | Oracle Database**

- Developed a banking system where users can create accounts, perform fund transfers, and view transaction history, while admins can oversee user activity and manage records
- Used **Core Java** for business logic, **JDBC** for database connectivity, **Servlets and JSP** for handling request and dynamic UI, and **Oracle** for backend data management

Smart Health Prediction System   **Java | Oracle Database | MVC**

- Formulated a system that allows users to enter symptoms and get disease prediction, while doctors can view reports and suggest treatments. admins handle doctor verification and manage the database
- Implemented using **Java** for application logic, **Oracle** for secure data storage, **MVC architecture** to ensure a clean, modular, and maintainable structure

Job Portal System   **Java | Oracle Database**

- Create a job portal where seekers can apply for jobs and track their applications, while recruiters manage postings and interviews
- Built using **Java** for application logic, **Oracle** for secure data storage, and **HTTP Session** for secure logic and access control

Internships

Deloitte   **July 2025**
Deloitte Australia Technology Job Simulation   *Remote*

- Completed job simulation involving development and coding tasks
- Wrote a proposal for creating a dashboard solution

Accenture   **Oct 2024**
Developer and Technology Virtual Internship   *Remote*

- Completed a virtual internship with Accenture, where I explored tech consulting by solving real-world client challenges using digital solutions

Technical Skills

Languages: C, Java, SQL, HTML5, CSS, JavaScript

DataBase: Oracle (SQL & PL/SQL)

Developer Tools: GitHub, VS Code, Eclipse IDE, SQL Plus

Certification

Java Full Stack Developer (Naresh IT - Hyderabad)   **Nov 2024 – Present**
Software Developer Associate (Nielit - Patna)   **Apr 2023 – Jun 2023**
